DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 3-6 are rejected under 35 U.S.C. 102 (e) as being anticipated by Zadno-Azizi et al (U.S. 6,022,336).

Regarding claim 1, Figures 6, 18c-18f and col. 11, lines 63-67, col. 21, lines 22-67, Zadno-Azizi et al disclose an assembly including: a catheter (140, 420), wherein at least one nozzle (144) locates adjacent the distal end. The catheter has the first and second components for dispensing through at least one nozzle (144); and wherein a structure (626) carries by the catheter distal to the one nozzle (144) and being arranged for expansion within the blood vessel. The structure (626) includes an open configuration allowing blood flow through the structure (col. 22, lines 16-25).

Regarding claims 3 and 4, wherein the assembly further includes a mechanism to operate the structure (626) between a collapsed and an expanded condition; and wherein the mechanism includes an element (434- inherent feature) to lock the structure in a desired condition.

Art Unit: 3731

Regarding claims 5 and 6, wherein an introducer assembly (labeled as a syringe in col. 21, lines 54-60) communicates with the catheter; and wherein the introducer assembly includes an air vent (412).

Allowable Subject Matter

2. Claims 2 and 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose the solid closure material composition forms a localized in the vessel puncture site, wherein a mixing chamber is used to bring the first and second components into a mixed condition.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
